RESIN4EXPERTS

TIKO-G Pro

Your Jewelry 3D Printing Cast Resin

One step beyond - The first jewelry cast resin with more than 25% sustainable raw materials.

Further to the sustainability Tiko-G also achieves top values thanks to its great product properties.

Compatible with ASIGA, Microlay, Phrozen, Ackuretta and many other LCD/DLP printers.

TIKO-G Pro

- Absolutely dimensionally stable after printing, no matter when you like to embed the printed model
- The printed jewelry pieces impress by their smooth and true to detail surface
- Burns 99.9% ash-free
- Can be processed with common investment materials

Excellent value for money

> 10% discount on initial orders
